CBD Seed Europe	2
------------------------------	----------

CBD SEED EUROPE

Our journey started in 2018 with the introduction of our first high CBD, low THC strain to be available in the US. This was one of the first commercial feminized CBD genetics that was the result of years of research. It wasn't until the regulations caught up in the form of the US Farm Bill that the CBD revolution truly took off. In the 2019 season our genetics were grown all over the US, with hundreds of farmers growing 20 million hemp plants for CBD production. But we always had Europe in mind.

Starting the process of introducing our genetics into Europe in 2020, we were told that it would be impossible to be approved with the current regulations in place, however we were determined to prove them wrong. EU regulators were seeing CBD products being introduced in EU shops, but none of it was grown in Europe and so we were approved to start our 2 year testing program together with the EU department of agriculture. Working closely with them on locations in Bulgaria, Italy and Spain to showcase our organic growing practices for our seeds and CBD hemp cultivation. It also gave us the opportunity to discuss new regulations with regulatory agencies across the Union. We are now finally seeing a shift in policy and governments are recognizing the importance and potential of CBD hemp as an industry in Europe.

AUTO-POWER CBD

AUTO-POWER CBD

CBD	7-10%
THC	< 0.2%
Germination	90%
Female	99.6%
Plants per Ha	10000
Mature Plant Height	1.2-1.5m
1000 Seeds Weight	11.6
Biomass Yield per plant	0.3-0.4kg
Biomass Yield per Ha	3000-4000kg
Flower Yield per plant	0.12-0.2kg
Flower Yield per Ha	1200-2000kg
